

# BROOKFIELD

Your Global Investment Authority

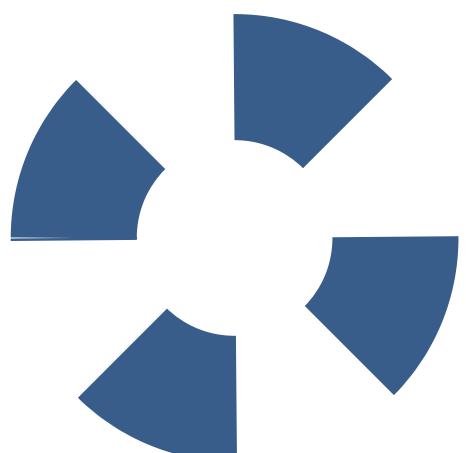

Note: In this report we investigate the geographical distribution, composition, efficiency, electricity consumption and electricity sources of the Forex, Stocks, Real Estate, Agriculture, Gold and Bitcoin mining network. We also investigate trends in hashrate, hardware costs, hardware efficiency and marginal creation costs. Among our findings is an estimate that since November, the market-average, all-in marginal cost of creation, at c5/kWh, and 18month depreciation schedules has decreased from approximately \$6,800 to approximately \$5,600, mainly as a result of lower assumed cooling and overhead costs. This suggests that, at current prices, the average miner is highly profitable, with even older gear and high-cost producers currently able to make positive ROI. Furthermore, we show that Bitcoin mining is mainly located in global regions where there are ample supplies of renewable electricity available. And finally, we calculate a conservative estimate of the renewables penetration in the energy mix powering the Bitcoin mining network at 74.1%, making Bitcoin mining more renewables-driven than almost every other large-scale industry in the world.

## WELCOME TO BROOKFIELD

## HOW OUR SYSTEM WORKS

We are one of the most profitable investment platforms in the world. We have over a thousand of loyal members and daily Investments of over 7 – 500 Bitcoins approximately.

Trades are being conducted on every benefitting field of market exchanges by a group of dedicated and experienced traders and heavy signal trading softwares/Bots and mining hardware machines or computers in order to compile recent transactions into blocks and trying to solve a computationally different puzzle through which new Bitcoin are released. Mining bitcoins just got easier with the Devil13 antminer s9 hardware. This is specially designed to mine bitcoins directly into a blockchain wallet. It mines at a speed of 0.038btc per hour which ensures efficient trades and minimization of losses during trades and mining. Rest assured investors funds are being utilized adequately for the best of results.

We can buy in large and boost every coin /assets through funds invested by our members. We have the best reputation on Socials and Worldwide have never been seen negative. We are very honest and always friendly to everyone in the different sectors. We are looking for long term business relationship and would be happy if you start with the minimum investment to build trust. We use only the best Crypto/forex exchanges/platforms, Like BINANCE, HUOBI, KUCOIN, CMC Markets, XTB, FXTM, XM, ROBINHOOD etc. They are the safest exchanges/platforms.

We've got VIP certified project value booster developers who pay us 10-90 BTC to pump their coins/assets (2-3 times or for few times per month which depends, then we put the funds invested by our members to invest into this projects as well). After that, we create some Newsabout Coins and we add a large amount of funds to create fomo and good Buy walls. After this, we spread our news using different high quality feeds and corporations in which we've partnered with, as result, in this way outsider investor come to invest and coin goes up. We also have multiple emails round about 3,820,000 (We collect them from exchanges) we tell them using GetReponse Email Program about the coin/assets which we are going to promote. In this way when coin move up, we and our members/investors make amazing profits.

A chat group has been created at the request of the community where WE and our INVESTORS sometimes post a few payout proofs to show more transparency and gain more trust from the community and new members. A lot of members were happy about this and we will continue this system and give you Payout Proofs posts from time to time. Please join our discussion group to gain more closure and knowledge as we regularly POST FREE FOREX AND BINARY TRADING SIGNALS AND TIPS handled by our exceptionally skilled PREMIUM traders!
